

SUPERLUME

Superlume (Pty) Ltd holds the proud
Sole Distribution
rights for the Focco range in South Africa.

Focco - the perfect partner

This is a trademark owned by EBIR, a company with 25 years' experience in manufacturing bathroom lighting and a reference in the industrial sector, as reflected by a prestigious portfolio of clients.

Available worldwide in shops specializing in bathroom supplies and DIY shops, FOCCO is designed for people who pay special attention to functionality and value aesthetics.

WE DESIGN THE LIGHTING SYSTEMS.

We create innovative designs in accordance with customer specifications, using the most advanced techniques for heat simulation analysis, optical design and light control system optimization with the highest quality materials.

WE SELECT THE BEST LEDS.

POWERED BY
SAMSUNG

Our luminaires contain **SAMSUNG LEDs** with the highest efficiency ratios - Lumen/Watt-, highest Color Quality Rendering, best of breed uniformity, longevity and smallest Mean-Time-Between-Failure ratios.

WE PRODUCE THE LIGHTING SYSTEMS.

We control the key manufacturing processes for achieving the best functionality, quality and guarantees in the market.

POWERED BY
SAMSUNG

ENERGY CONSUMPTION REDUCTION

Energy efficient products

REPLACEABLE SPARE PARTS

Repairability ensures life extension of products.

RECYCLING

Environmentally friendly products made out of recyclable and/or recycled raw materials and packaging.

CO2 EMISSIONS REDUCTION

More than 80% of the mirror is produced locally, reducing transport requirements and improving lead times. Use of solar panel, renewable energies and other measures for minimizing our impact..

BENCHMARK BRAND

Occupies the leading position in Europe in bathroom lighting manufacturing.

25+ years

DISCOVER WHY THE LIGHTING OF YOUR MIRROR IS IMPORTANT

LIGHTING IN THE MIRROR

CEILING LIGHT

When putting on make-up or shaving

- Get a **better view of details**
- See the **natural tone** of your skin

As part of your day-to-day routine

- **Uniform light**, without shadows
- A light that's gentle **on the eyes**

To let you **relax**

- Proper lighting helps to create an **intimate atmosphere** that encourages relaxation

DESIGN LAB

Our in-house Design Team works to create products that incorporate the latest technological and aesthetic innovations at our customers' service.

After years of studying light and its use, we design products that provide users with the ideal intensity and quantity of light for their tasks in front of the mirror.

COMMITMENT TO SUSTAINABILITY

We constantly improve our LED technology, with the aim of making it more efficient every day.

We work to ensure that our products reach our customers in packaging that pollutes less. What's more, we continue to incorporate more and more recyclable and replaceable components into our collections.

ATTRACTIVE, USER-FRIENDLY & SECURE PACKAGING

HELPING THE SELLER

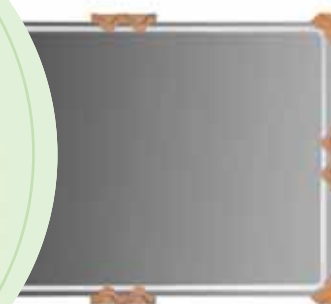

*Handle not available
for 100+cm wide
mirrors for safety
reasons.*

FOCCO packaging contains all the information that the user may require before buying a product. Frequently asked questions such as “Where can I install it?” or “How much light is it going to give me?”, making purchasing decisions a lot easier.

Secure packaging that matches the quality of our products and reinforces the customer’s positive impression.

**ECO FRIENDLY PACKAGING
PROGRAMME, WE ARE
REDUCING THE USE OF

- **EASY TO HANDLE** packaging.

High Quality

- ✓ **Lighting systems that ensure the functional reliability of the mirrors.**
 - UV Test -> anti-crack, antiyellowing.
 - 100.000 on/off cycles Test.
 - Thermal shrinkage Test.
 - Thermal Management Test.
- ✓ **We reduce returns.**
- ✓ We reduce consumption of electricity while increasing functionality.
- ✓ **Own Manufacturing and Quality Controls.**

LIGHTED MIRRORS CLASSIFICATION

DIRECT

LIGHTING

Mirrors with direct or task lighting are those which collect and project all the light frontally towards the user thanks to specifically designed systems.

This type of mirrors provides greater functional luminosity -lumens focused to the user- and can light up the entire bathroom without any additional lighting.

It is ideal for precision tasks as applying make up or shaving, providing effective lighting on the face to get a better view of details.

This kind of lighting also helps create a stimulating and active environment.

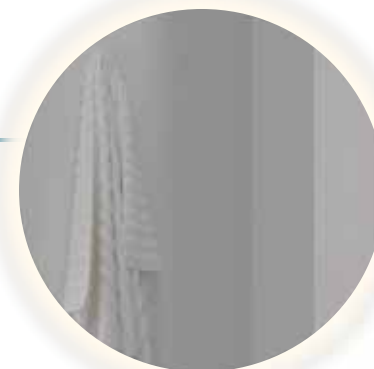

AMBIENT

LIGHTING

Mirrors with ambient lighting project light indirectly: on these mirrors light is not redirected by a screening system but diffused around the LED source, being visible on the front (functional light on sandblasted mirrors) and the rear (decorative light on the wall).

Mirrors with ambient light provide pleasant soft light and a wall-glow effect that give the room a warm atmosphere that help relaxation and to relieve tension.

LUMINAIRES

LUMINAIRES VALUES

Maximum Functionality

All our products are designed to meet the user's lighting needs in front of the mirror.

Wide Range

A wide range of designs and dimensions of our products, which makes it easier to fit them in with the furnishings in style and size.

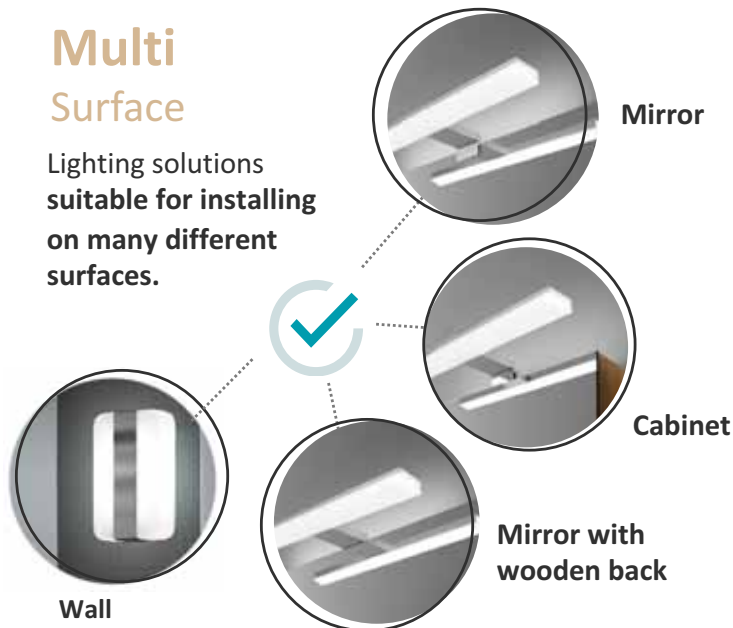

Easy Installation

Simple steps for anyone to be able to perform with the aid of our installation sheet.

Multi Surface

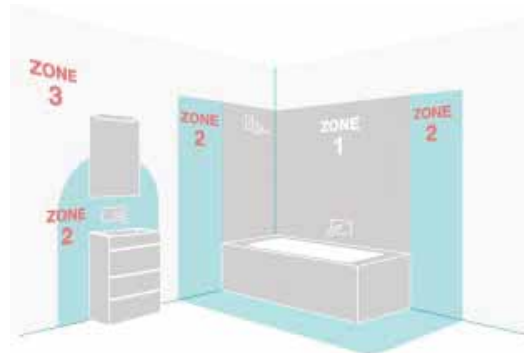

Lighting solutions suitable for installing on many different surfaces.

Maximum Safety

Indicates that light fittings can safely be installed in zones 2 and 3

Minimum Consumption Maximum Savings

Less means more

- Responsible consumption
- Savings in your light bill
- Better light quality
